## TECH STACK

- React / NextJs
- NodeJs /ExpressJs
- Javascript / Typescript
- TailwindCss
- Python
- Terraform
- AWS
- Go
- Datadog
- Docker
- MongoDB / Firebase / PostgreSQL

## EXPERIENCE

### DTN

Software Engineer

March 2023 - Current

- Developed and maintained new features for the platform's frontend using React and Next.js, enhancing performance and user experience.
- Improved backend services using microservices architecture with Node.js, Docker, and MongoDB, boosting system scalability and reliability.
- Strengthened platform stability by implementing robust CI/CD pipelines and infrastructure management through Terraform and AWS.
- Integrated real-time monitoring and alerting with Datadog, reducing production incidents by proactively addressing potential failures.
- Mentored new team members on development best practices, accelerating onboarding while maintaining high code quality standards.
- Spearheaded an initiative to streamline and automate the process of building new UIs by integrating Storybook and GitHub Copilot, reducing development time and improving component reusability.
- Architected and deployed a company-wide platform from scratch, establishing multiple environments using Terraform and AWS infrastructure-as-code practices.

### Krowd Innovation

Founder

November 2021 - February 2023

- Developed and deployed a blockchain-powered ticketing platform using Solidity, ensuring tamper-proof event records and enhanced security.
- Engineered a scalable API system for recording and verifying Non-Fungible Tickets (NFTs), improving ticket authentication and preventing resales.
- Managed in-person event "Non-Fungible Talks" (March 2022) in Manchester, showcasing innovative ticketing solutions and driving industry interest.
- Delivered a presentation at Fintech North Manchester (November 2022), sharing insights on the role of blockchain in ticketing and event management.
- Secured partnerships through AccelerateME (University of Manchester) and Exchange Enterprise City, leveraging growth opportunities and industry mentorship.
- Oversaw technical development, leading cross-functional teams and ensuring successful delivery of customer-centric blockchain solutions.

## EDUCATION

- Msc Physics With Astrophysics

University of Manchester

2018 -2022
